HKEX Public Data Sources — Scraping Roadmap

All sources below are publicly accessible on HKEX or HKEXnews. No paid data licences are required. Difficulty reflects the scraping complexity relative to the existing DI portal scraper.

OWNERSHIP & SHAREHOLDING

Direct ownership signals — complement to Disclosure of Interests data

Source	What it shows	How it fits Circular	Scraping	Link
CCASS Shareholding Search	Daily broker/custodian-level share breakdown in the central clearing system. 12 months of history, searchable by stock or participant.	DI only shows $\geq 5\%$ holders. CCASS shows every custodian and broker below that threshold — reveals the full ownership stack.	Medium	hkexnews.hk · CCASS Search
Stock Connect Northbound Shareholding	Aggregate mainland Chinese investor holdings in each HK stock via Shanghai & Shenzhen Connect — updated daily.	Shows "mainland money" as a single % per stock. Highly material for large-caps (Tencent, Meituan, Alibaba).	Easy	hkexnews.hk · Stock Connect

CORPORATE ACTION FILINGS

Filed on HKEXnews — all share capital events that interact with buyback and DI data

Source	What it shows	How it fits Circular	Scraping	Link
Share Buyback Monthly Returns	Monthly return of each repurchase batch: volume, price range, shares cancelled. Mandatory under Listing Rule 10.06.	Buybacks reduce the float — can push a DI holder's % up mechanically without any purchase. Critical context for % threshold crossings.	Easy	hkexnews.hk · Title Search
Repurchase Mandate Circulars	AGM circular containing the Explanatory Statement for Repurchase of Shares — sets the annual mandate limit (typically 10% of issued capital).	Needed to calculate mandate headroom: how much of this year's authority remains. Source of mandate size and expiry date.	Medium	hkexnews.hk · Circulars
Placings & Equity Issuances	Headline categories: Placing, Issue of Shares under General/Specific Mandate, Rights Issue, Open Offer — all mandatory announcements.	Equity issuances expand the float and directly offset buyback activity. Show on the 1-year chart alongside buyback bars.	Medium	hkexnews.hk · Title Search
Convertible Bond Offerings	"Issue of Convertible Securities" headline category — announces principal, coupon, and conversion price.	Potentially dilutive. Conversion price acts as a ceiling on the buyback's price support logic. Mark on the 1-year chart.	Medium	hkexnews.hk · Title Search
Directors' & Officers' Dealings	Insider share transactions — director name, date, shares bought/sold, average price. Filed within 3 business days.	Insider buying alongside a new substantial shareholder filing is a compound signal. Both can surface on the same By Stock page.	Medium	hkexnews.hk · Title Search
Results Announcements	Interim and annual results filing dates back to 1999 — title, date, and PDF link.	Earnings calendar for the Timeline tab. Lets users see whether a DI change happened before or after results.	Easy	hkexnews.hk · Title Search

MARKET SENTIMENT & TRADING STATISTICS

Trading behaviour context — published daily by HKEX as plain HTML or downloadable files

Source	What it shows	How it fits Circular	Scraping	Link
Short Selling Turnover (daily by stock)	Daily short selling volume and value per stock, as % of total turnover. Published each trading day.	A fund can be a $\geq 5\%$ DI long holder while running a short book. Showing both reveals the net position picture. Extends the existing DI short position field.	Easy	hkex.com.hk · Short Selling
Stock Connect Daily Fund Flows	Net daily buy/sell flows through Shanghai & Shenzhen Connect — per-stock Northbound and Southbound breakdown.	Pairs with Northbound shareholding %: is mainland money still accumulating or distributing? Natural companion chart.	Easy	hkex.com.hk · Stock Connect Stats
Securities Statistics Archive	Historical daily turnover and market cap for every Main Board and GEM stock — goes back many years.	Volume context for the Timeline tab. Was there an unusual turnover spike on the day of a large DI filing? Needed for % of daily volume column in buyback tracker.	Easy	hkex.com.hk · Statistics Archive
Short-Selling Eligible Securities List	Static list of stocks approved for short selling — updated periodically by HKEX.	One-line metadata badge per stock ("Short selling permitted"). Context for reviewing institutional holders running long/short strategies.	Easy	hkex.com.hk · Eligible Securities
